

Job Title: QA Tester
Reports To: QA Manager

Job Summary

At Bytron we believe that at the heart of every great company is a team of brilliant, driven professionals. We're a values led Company and aim to ensure all our employees feel valued and motivated to achieve their very best.

Our aim is to exceed expectation and create innovative digital products that make information more accessible and useful, enabling people to achieve more.

As a member of the Production Team, the QA Tester will report to the QA Manager and work collaboratively with the QA Team and wider Production Teams under the direction of the Chief Production Officer to ensure that our software solutions are rigorously tested prior to being released, following all standard testing processes.

The successful applicant will be currently working as a Software Tester and will be ISTQB certified

Location

Headquartered in the North Lincolnshire village of Kirmington, we also have offices in Hull, East Yorkshire and fully support a hybrid working schedule. It may be necessary for the successful post holder to travel to our offices for training or meetings and on that basis the successful applicant will be able to commute easily to one of our offices.

Responsibilities and Duties

You'll be working within our QA team and will be involved in testing the quality of our flagship aviation software.

Specific duties include

- Execute test scripts, ensuring any new development features function correctly prior to being released (this includes documentation of user manuals and information required for release notes).
- Testing the web-based applications via multiple browser versions as well as testing tablet application on multiple devices.
- Working independently and collaboratively with the wider QA team to manage JIRA, test plans, test runs, regression testing and have input into automation testing.
- Be a product specialist and support the wider teams to provide training both internally and externally to clients.
- Maintaining documentation including training materials as required.
- Communicate with our internal Support team to identify any software application problems and work collaboratively to educate our Development team to improve our systems.
- Keep up to date with current industry news and relevant technologies relating to the product(s) and testing standards.
- Support end users to understand how they use the systems and provide appropriate feedback.
- Work collaboratively with the Development Team to fully understand the system and any changes that impact testing of features.
- Report significant issues or concerns to the QA Manager and provide recommended process improvements as needed.

- Checking data source feeds by checking the data source providers and connecting directly to our Oracle database repositories to interrogate the data.
- Testing new software development including post release testing/ verification
- Recording and reporting test results to the QA and development teams
- Create and update existing user documentation and release notes
- Troubleshooting issues
- Day to day quality assurance of the software (checking for issues, bugs etc)
- Processing of test data
- Developing test plans
- Creation of test data

** although not a specific requirement of the role, due to the location of the offices the successful candidate will be a driver with access to a vehicle

Experience, Skills and Knowledge

- ISTQB certified is essential
- Minimum 2 years current commercial experience as a QA Tester is essential
- Must be self-motivated and a hard worker with the ability, passion and drive to work to tight deadlines and achieve goals
- Ability to receive feedback positively
- A demonstratable working knowledge of software testing and current practices as detailed in the job specification
- A real passion for software testing and delivering quality
- An excellent communicator both written and verbally
- A positive, professional team player that has a real drive to achieve targets - we are a values-led organisation and actively promote a great working environment, positive team spirit and inclusivity

Staff Benefits

- Excellent Pay (depending on experience £30,000 to £35,000 per annum)
- 25 days annual leave rising with service length plus public holidays
- Holiday Purchase Scheme
- £50 Birthday Voucher
- Company pension scheme
- Supported hybrid/remote working
- Life Assurance (4 X Salary)
- Summer and Winter bonuses based on length of service (after 12 months)

Applicants must have the right to live and work indefinitely within the United Kingdom

Our vacancies are not open to recruitment agents
