

Job Title: Senior QA Software Tester
Reports To: QA Lead

Job Summary

Are you looking for a new challenge for 2019? Do you want to test your skills working on an award winning software product that's leading the way in innovation? Are you looking to make your mark within the aviation industry working with global airlines such as: Thomas Cook, FlyDubai, Virgin and Boeing?

If you think you have what it takes to be part of our elite team, then we want to hear from you.

Due to continued expansion, Bytron Aviation Systems are looking for a **Senior QA Software Tester** to join our highly skilled QA Team. We are specialists in developing cutting edge flight data management systems for the aviation industry which are marketed on a global scale. The successful candidate will be ISTQB certified and highly experienced and competent as a Software Tester.

Location

Our Headquarters are situated approximately one mile from Humberside Airport in the village of Kirmington. We are surrounded by the picturesque Lincolnshire countryside which is ideal for a lunchtime walk. The local pub The Marrowbone and Cleaver and St Helana's Church are a couple of minutes away; offering a great place to relax and think-up the next innovative feature we can add to our aviation suite of products.

Responsibilities and Duties

- Execute test scripts, ensuring any new development features function correctly prior to being released
- Documentation of user manuals and release notes
- Testing the web based applications across multiple browsers as well as testing tablet application on multiple devices.
- Working independently and collectively with the wider QA team to manage JIRA, test plans, test runs and regression testing.
- Become a product specialist and support the QA Team Leader to provide training and demonstrations both internally and externally to clients

- Support the QA Team Leader in maintaining training materials and documentation
- Communicate with our internal support team to identify any software application problems and educate our development team to improve our systems
- Keep up to date with current aviation news, technology and competitors
- Support end users to understand how they use the systems and provide feedback
- Work collaboratively with the Development Team to fully understand the system and any changes.
- Report significant issues or concerns to the QA Team Leader and provide recommended process improvements.
- Checking data source feeds against our providers ensuring the quality of the data.

Experience, Skills and Knowledge

- Have a strong background testing software (minimum 3 years experience)
- Have strong written and oral communication skills
- Hold an ISTQB qualification.
- Working knowledge of SQL is advantageous
- A creative problem solver, with the tenacity to go the extra mile to understand and resolve a problem
- Have strong written and oral communication skills
- Good communication skills, oral and written
- Ability to work well under pressure and to tight deadlines

** although not a specific requirement of the role, due to the remote location of the offices the successful candidate will be a driver with access to a vehicle

Staff Benefits

- Excellent Pay (salary negotiable, depending on experience)
- starting on 22 days annual leave plus public bank holidays, rising to 24 days plus PBH after 3 years
- Company pension scheme
- Flexible working scheme
- Holiday purchase scheme

- Summer and Winter bonuses based on performance
- Free drinks and fruit at work
- Choice of hardware - we all use the latest technology
- Free onsite parking
- We also have a spacious building with a fully equipped kitchen area and 'chill out zone' with a games area

How to apply
